(57) **ABSTRACT**

Systems, methods, and computer-readable mediums, consistent with principles of some embodiments of the present invention provide for managing product purchase information including receiving a list of a plurality of products to purchase at a personal computing device, wherein the list includes an indication representing whether the plurality of products have been selected for purchase, updating the list with an indication that at least one of the plurality of products has been selected for purchase when the personal computing device receives information that the one of the plurality of products has been selected, updating the list by adding at least one new product, representing ingredients of a recipe, to the list when the personal computing device receives input that the recipe has been selected; and displaying the updated list.
